QFDQX Basic Endocrinology For Students Of Pharmacy And---

Summary Endocrinology is the field of medicine concerned with endocrine tissue (e.g., the pituitary gland, thyroid gland, adrenals, testicles, and ovaries), metabolic diseases, and to an extent, nutritional medicine. Endocrine tissue is responsible for producing and secreting hormones, which influence the function of certain cells and organs.

General endocrinology - Knowledge for medical students and---

Basic Medical Endocrinology is intended to present information on normal endocrine physiology to prepare the student for studying endocrine diseases and also for understanding the molecular and cellular alterations that disrupt normal function. The previous edition was published nearly a decade ago, which is a long time given the vast strides that have been made in this field.
