Study And
Abstract. Damage to
Case Study And
Its Implications
a particular area of
the brain — the
neocortex — is
generally understood
to result in blindness.
Studies of some
patients who have
suffered from this
form of blindness
have nevertheless
revealed that they
can, in fact,

Blindsight A

Weiskrantz blindsight
a case study and
implications: Review

Blindsight is the ability
of people who are
cortically blind due to
lesions in their striate
cortex, also known as
the primary visual
cortex or V1, to
respond to visual
stimuli that they do
not consciously see.

Download

Ebook

The majority of studies on blindsight are conducted on patients who have the conscious blindness on only one side of their visual field.

Following the destruction of the striate cortex, patients are asked to detect, localize, and discriminate amongst visual stimuli that are
