Effective January 2014, the
Fundamentals of Engineering (FE)
exams are drastically different. The
new format, to be delivered via CBT
(computer based testing), will become
the norm in 2014. The exam can be
taken throughout the year, unlike the
twice a year schedule. The syllabus for
the new FE CIVIL exam is very
different from the one you would have
taken if you took the paper test (last
one October 2013). The test will now

have approximately 5 hours and 20 minutes available for approximately 110 questions. In the past, AM questions were of the 2 minute variety and PM questions were of the 4 minute variety. Now, you have about 3 minutes per question. So, the average pace of the exam is about the same. This book has a full length practice exam with a mix of questions as recommended in the official syllabus (www.ncees.org). The only reference that should be used is the FE Reference Handbook, 9th edition, preferably the electronic (PDF) version, since the CBT exam will be supported by a PDF version of the handbook rather than a hardcopy. The practice exam contains questions from Mathematics, Probability & Statistics, Computational Methods, Ethics, Engineering Economics, Statics,
