The "guidebook" as we marines call it is generally part of the basic issue in recruit training... it details what should be known and learned throughout the training process (may also be used as a refresher). Unfortunately I've only seen one copy of the Marine Corps Reserve version during my entire career, which for some of us is a better book.

Here is everything there is to know about the essentials of life as a Marine. From fitness to first aid to firing positions, this book covers all subjects in which every troop, regardless of rank, must maintain proficiency. Learn the Military 's Code of Conduct, understand the Dos and Don ' ts of surviving as a POW, and grasp the foundation of military law. Find out about Marine customs, uniforms, and drills. Follow the Marine Corps fitness routines to get into the best shape of your life. Read the detailed section on first aid and learn how to perform CPR, make braces for broken limbs, dress and bandage wounds, improvise slings, and transport injured victims. Find out about the symptoms and treatment of chemical agents and learn how to safely travel through a contaminated area. Also included in the U.S. Marine Guidebook are marksmanship requirements; navigation tactics; and nuclear, biological, and chemical defense. The U.S. Marine Guidebook details procedure during combat, including code of conduct in war and when to use deadly force. Because these subjects are first taught and tested during recruit training, they are the distinctive qualities of a Marine and his training. Anyone who is interested in what makes a Marine the strong, brave, and skilled individual he or she must be will find this book fascinating.

Today ' s Marines operate within a continuum of force where conflict may change from low intensity to high intensity over a matter of hours. Marines are also engaged in many military operations other than war, such as peacekeeping missions or noncombatant evacuation operations, where deadly force may not be authorized. During non-combative engagements, Marines must determine if a situation warrants applying deadly force. Sometimes Marines must decide in a matter of seconds because their lives or the lives of others depend on their actions. To make the right decision. Marines must understand both the lethal and nonlethal close combat techniques needed to handle the situation responsibly without escalating the violence unnecessarily. Marine Corps Reference Publication (MCRP) 3-02B, Close Combat, provides the tactics, techniques, and procedures of Marine Corps close combat. It also provides the doctrinal basis for the Marine Corps Close Combat Training Program (MCCCTP). This manual contains the following chapters: Overview of Close Combat 1. Purpose of Close Combat 2. Continuum of Force 3. Marine Corps Tactical Concepts Chapter 1. Fundamentals of Close Combat 1. Ranges of Close Combat 2. Weapons of the Body 3. Target Areas of the Body 4.
