A techno-economic analysis of small-scale, biomass-fuelled

...

This paper reports a techno-economic analysis on the possible commercial application of gasification technologies for small-scale (2 MWe) power generation from biomass.

The analysis is based on the preliminary experimental performance of a 500 kWth pilot-scale air-blown bubbling fluidized-bed (BFB) gasification plant, recently installed at the Sotacarbo Research Centre (Italy) and commissioned in December 2017.

Techno-Economic Analysis of a Small-Scale Biomass-to ...

Abstract In this work, the techno-economic analysis of a

Development and techno-economic analysis of small modular ...

This paper presents a novel concept of improved TDP series for small-scale ORC. Thermal and economic performance of ORC by using TDP series are first analyzed and compared in terms of energy efficiency, power output, thermal stability, capital cost, etc. The optimal dividing number and suitable working conditions are summarized as the key guideline.

Techno-economic analysis on a small-scale organic Rankine ...

In March 2015, government commissioned an independent Techno-Economic Assessment (TEA) of Small Modular Reactors (SMRs) in order to contribute to the evidence base
